MATERIAL SELECTION MANUAL

A black and white photograph showing the ruins of a building. The structure is heavily damaged, with large sections of its walls missing, leaving only skeletal remains of concrete or masonry. The ground is covered in a thick layer of rubble, including broken bricks, stones, and pieces of wood. In the foreground, a small, vibrant green plant with two leaves is growing out of the debris, providing a stark contrast to the dark, desolate scene. The lighting is dramatic, with strong highlights and deep shadows, emphasizing the textures of the destruction.
